

Dear Walmart and Sam's Club Suppliers,

Walmart and Sam's Club rely on the accurate, standardized data received through Global Data Synchronization Network (GDSN) for existing and new items. GDSN uses global industry standards to provide suppliers the ability to exchange item data electronically for item creation and maintenance.

GDSN benefits to Walmart, Sam's Club and our Suppliers include:

- Increased speed-to-shelf for new products
- Reduces time and errors for item creation and maintenance
- Improved purchase order accuracy
- Increases efficiencies within the inbound and outbound logistics processes
- Global Replenishment System (GRS) implementation

If you are not yet synchronizing your data with Walmart and Sam's Club via GDSN, please visit our 1WorldSync landing pages to get started. Documents available include the following:

- Steps to Sync [Walmart Landing Page](#)
1worldsync.com > Customers > Walmart
- Attribute Mapping
- Implementation Guide [Sam's Club Landing Page](#)
1worldsync.com > Customers > Sam's Club
- FAQ's

For technical assistance, please contact 1WorldSync support.

- Email – technicalsupport@1worldsync.com
- Phone – 1.866.280.4013

Thank you for your continued support and attention in regards to this very important initiative for Walmart and Sam's.

Sincerely,

Laura Wilkin
