

Digital Asset Management (DAM) Training for VIP

1WorldSync Fast Track

Kroger's recommended Fast Track option will expedite the VIP process, ensuring you meet Kroger's requirements the first time.

Image Capturing

1WorldSync captures images of your products, meeting Kroger's image requirements as well as the requirements of other retailers, even those looking to **enable 360° imagery**. You retain ownership of these images.

Image Hosting

Images are hosted on your behalf, enabling electronic delivery to Kroger (and other retailers with 1WorldSync data pool membership).

Information Loading

1WorldSync quickly formats, loads, and delivers your product information, including images, saving you time and effort.

Need Assistance? **Kroger's recommended Fast Track option** will expedite the VIP process, ensuring you meet Kroger's requirements the first time.

01

Digital Asset Management Overview

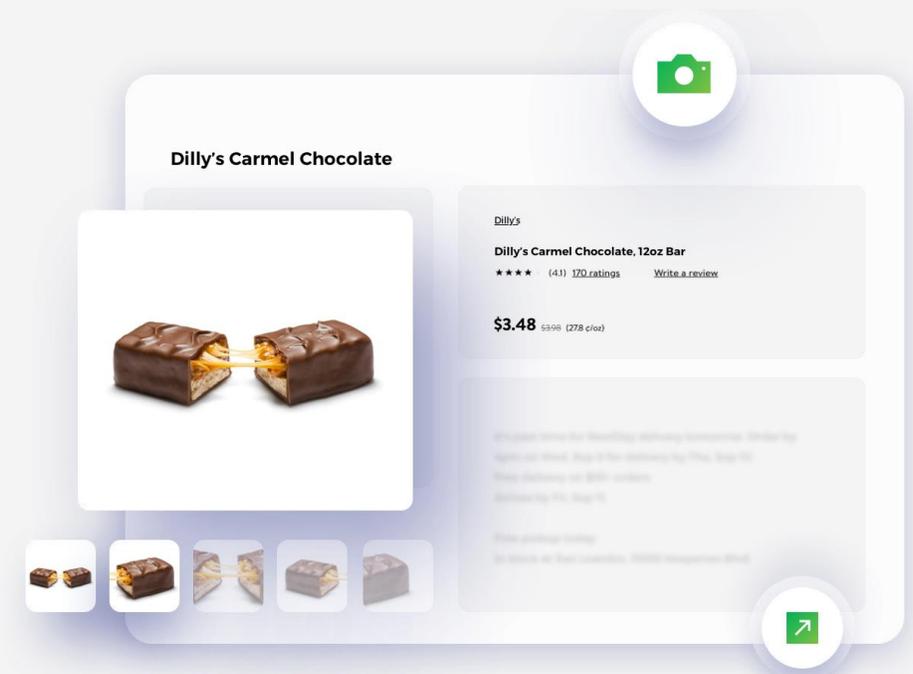

Digital Asset Management Features

Kroger Suppliers

- Manage all digital assets in VIP with your other product information
- Associate product images with your sellable items
- Send images to Kroger that meet Kroger's image requirements
- VIP will host your images for no additional cost if you are a current VIP subscriber

Kroger

- Receive accurate, up-to-date images assigned in conjunction with product data

Enabling Digital Asset Management

To add DAM to VIP, you can sign the [Addendum for DAM](#) located on the Kroger landing page on 1worldsync.com.

Completing the DAM Addendum

- Once the addendum is signed, it will automatically be sent to 1WorldSync for processing
 - You can also download a copy of the form
- DAM enablement takes 2-3 business days
- Item Management suppliers who complete the addendum will also be able to add digital assets in IM

ADDENDUM FOR DAM FUNCTIONALITY AND DISPLAY OF IMAGES, INCLUDING THIRD-PARTY IMAGES

1WorldSync is pleased to offer your company (Company) Digital Asset Management (DAM) functionality for image storage, as well as the ability to display images from DAM and third-party providers, as additional features under Company's current subscription for data sync platform services. This Addendum includes additional terms for use of such features, and is a supplement to Company's underlying data sync services/data pool agreement with 1WorldSync. The remaining terms of the data sync services/data pool agreement will remain in effect, and are incorporated into this Addendum by reference. Notwithstanding the foregoing, the functionality provided under this Addendum shall be limited to ninety (90) images per individual GTIN and is only available for use by existing PI and VIP customers for Kroger.

Please enter the information requested below and sign the document using the digital signature process. Alternatively, you can print out this Addendum, and return a completed and signed copy of this Addendum to us by e-mail to businesssupport@1worldsync.com. Please allow 1-2 business days following receipt of the signed Addendum for DAM to be enabled for your Company. If you have questions, or would like a copy of your company's underlying data sync services/data pool agreement with 1WorldSync, contact us by email at businesssupport@1worldsync.com.

Using Digital Asset Management in VIP

Adding Digital Assets

To add digital assets in VIP, click **Add Digital Assets** on the item page (Figure 1). Once selected, you will be shown a pop-up window (Figure 2). Here you can click **Select Files** to navigate to the file on your local computer. Uploading the file begins once **Upload Assets** has been selected.

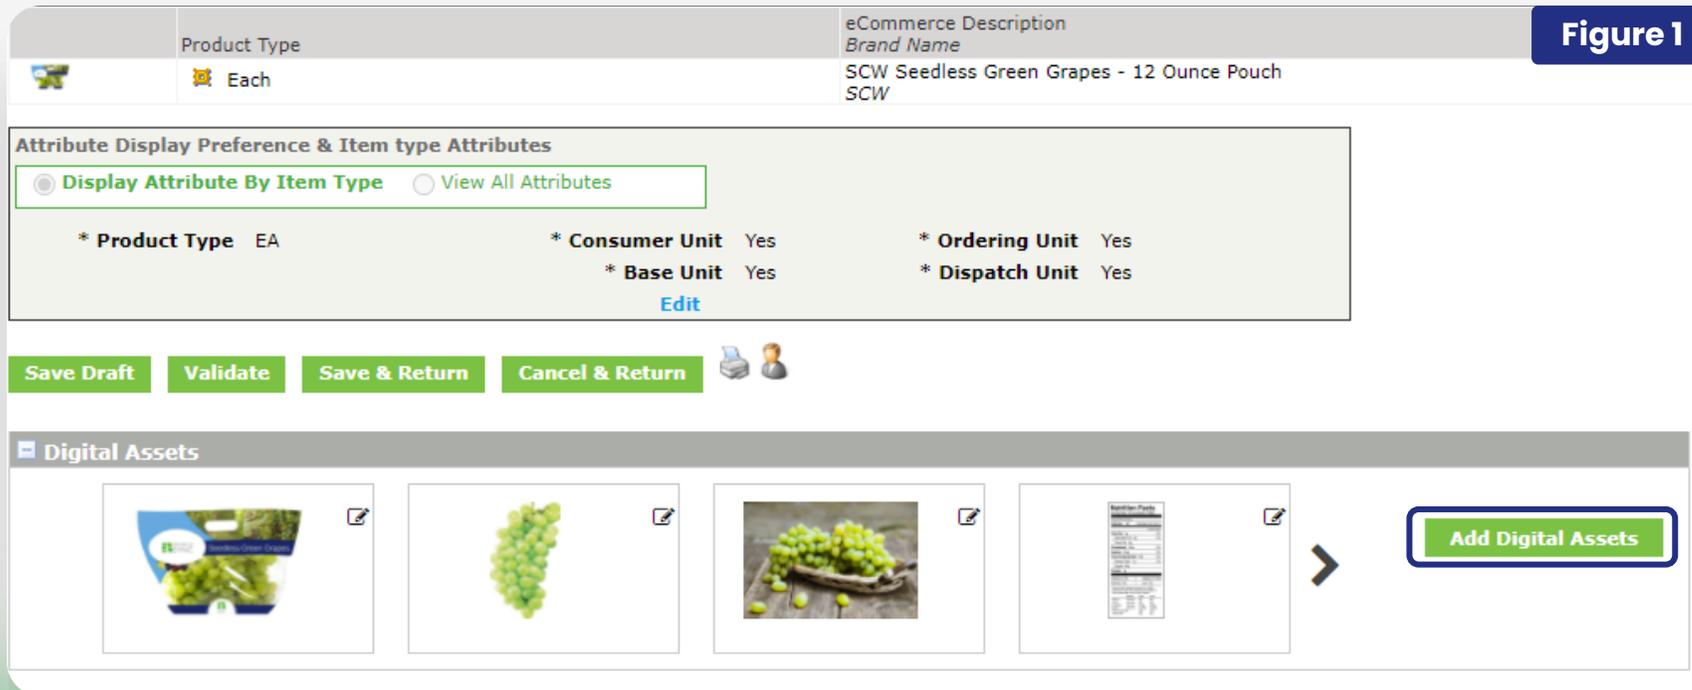

Figure 1 shows the product page for 'SCW Seedless Green Grapes - 12 Ounce Pouch'. The page displays product details such as 'Product Type: Each' and 'Brand Name: SCW'. Below the product information, there is a section for 'Attribute Display Preference & Item type Attributes' with options to 'Display Attribute By Item Type' (selected) or 'View All Attributes'. The attributes listed include Product Type (EA), Consumer Unit (Yes), Ordering Unit (Yes), Base Unit (Yes), and Dispatch Unit (Yes). At the bottom of the page, there is a 'Digital Assets' section with four asset thumbnails and a highlighted 'Add Digital Assets' button.

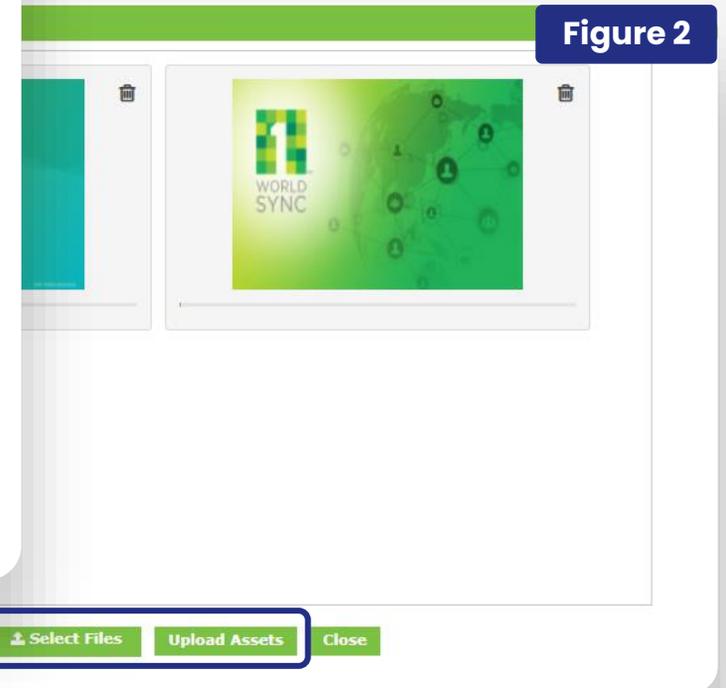

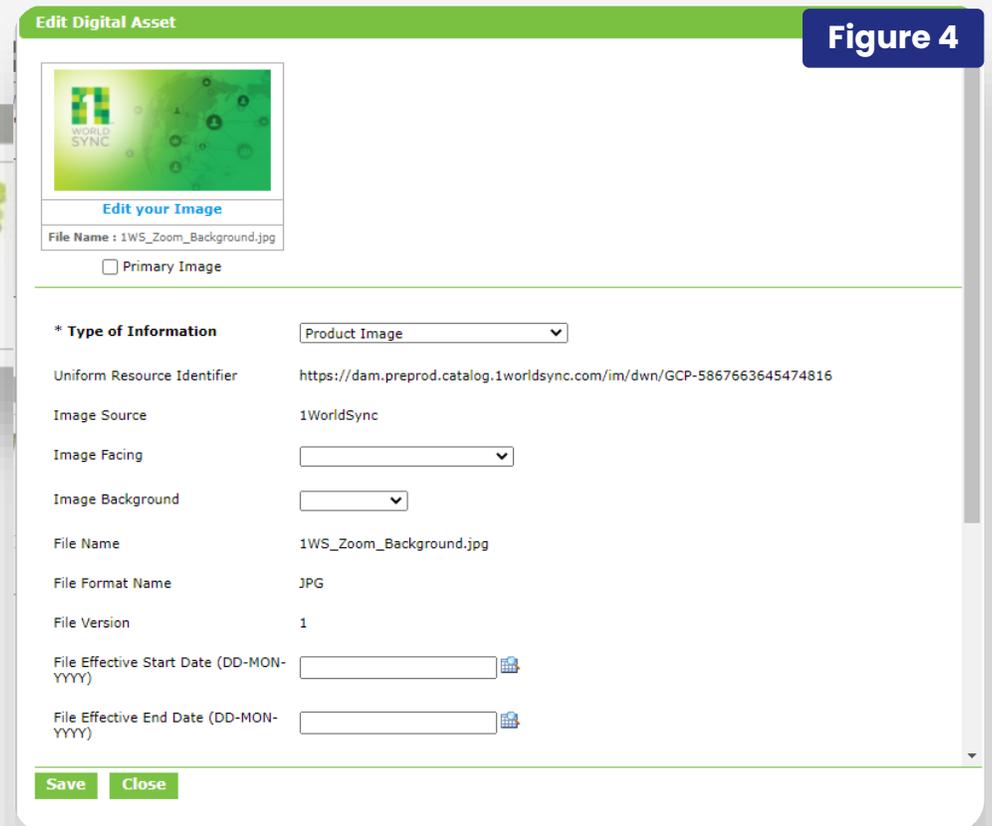

Figure 2 shows the 'Add Digital Assets' pop-up window. It features a file selection interface with a 'Select Files' button highlighted. The window also displays a preview of a digital asset, a green graphic with the 'WORLD SYNC' logo and a globe. At the bottom of the window, there are 'Upload Assets' and 'Close' buttons.

Editing/Removing Digital Assets

Digital assets added in VIP can be **edited and/or removed** by clicking the icons in *Figure 3*. Digital asset attributes will then be displayed in the pop-up window as shown in *Figure 4*. If you publish digital assets through GDSN, you will **not have the option to delete them in VIP**. This must be done in GDSN.

Adding External File Links

Non-GDSN suppliers can add external file links (EFLs) to VIP. To add EFLs, click **Add External File Link** on the item page (Figure 5). Once selected, a pop-up window will appear (Figure 6) allowing you to add your EFL attributes.

The image shows a product page for 'Yummy Maple Syrup' with a pop-up window titled 'Add External File Link'. The product page includes a 'Product Type' dropdown set to 'Each', an 'eCommerce Description' section with 'Brand Name' 'Yummy Maple Syrup', and an 'Attribute Display Preference & Item type Attributes' section with radio buttons for 'Display Attribute By Item Type' and 'View All Attributes'. Below this are fields for 'Product Type', 'Consumer Unit', 'Base Unit', 'Ordering Unit', and 'Dispatch Unit'. At the bottom of the product page are buttons for 'Save Draft', 'Validate', 'Save & Return', and 'Cancel & Return', along with a 'Digital Assets' section showing a landscape image. The pop-up window has a title bar 'Add External File Link' and two buttons: 'Add Digital Assets' and 'Add External File Link', with the latter being highlighted by a blue box. The pop-up also has 'Save' and 'Close' buttons at the bottom.

Figure 6

Editing/Removing External File Links

External file links added in VIP can be **edited and/or removed** by clicking the icons in *Figure 7*. External file link attributes will then be displayed in the pop-up window as shown in *Figure 8*. If you publish EFLs through GDSN, you will **not have the option to delete them in VIP**. This must be done in GDSN.

Digital Asset Management Requirements for VIP

Digital Asset Requirements

DAM allows for a **maximum of 20 digital assets** to be included for each item in your hierarchy. In addition, Kroger also has requirements for images that can be found [here](#) and they are also outlined below.

Kroger Product Image Requirements

- 1,000 pixel minimum in one direction
- 300 DPI (Resolution)
- RGB Color Mode
- White or Transparent Background
- File type must be .jpg or .png
- File name must include UPC (GTIN-13 format is preferred)
 - Example: 0005172100228.jpg
- Multiple views can be designated using dashes or similar naming
 - Example: 0005172100228-1.jpg
 - Example: 0005172100228-front.jpg
- Images must meet style guidelines
- Product only shots
- No lifestyle shots
- Single product in one image
- GSI standard preferred
- Multiple angles preferred, especially pertaining to nutrition facts and ingredients
