Network® Distribution needs your Full Suite of Product Content Today!

Dear Valued Supplier,

For over 50 years, Network has created supply management solutions that help customers source, order, and receive products needed to keep business running. As conducting business transforms into a sophisticated activity for enterprises, where automation, business intelligence, and smart technologies mingle and merge at every step, getting the fundamental aspects of product information management right has become vital.

We've Got Your Back

Seasoned risk managers have recently identified data sharing as one of the top five strategies for weathering supply chain disruptions. You can now publish your full suite of product content to Network via the Global Data Synchronization Network (GDSN®). We'll integrate your GDSN data into Network's robust catalog discovery system. Our distributor members use this system daily to quickly source and deliver your products to market.

How We Can Help

1. **Complete/Update your Network Trading Partner Form**….
   - Having your current GLN and contact information ensures we can distribute your products efficiently.

2. **Publish your Complete Product Catalog Content as soon as possible**. Network is asking you to publish all available product content to meet current market demands.

   - Review the detailed Step-by-Step Instructions in the Network Implementation Guide
   - If you have previously published to Network, please ensure your product content is up to date and you have published all available catalog items
   - **Network's GLN: 0816006000001**

Need Help?

1WorldSync can help you access the GDSN, manage your product content and even load it for you!
