Webco Hawaii GLN – Publish To

Production: 0763173000009

Webco Data Sync Environment

Data Pool: 1SYNC
System: Sync/PDI for Distributors – Aligntrac Solutions

Catalogue Item Confirmations (CIC's)

Normally Webco Hawaii will automatically return a CIC within hours of the Supplier publishing to Webco Hawaii. Webco Hawaii makes use of the CIC as follows:

Synchronized	Item is available for Webco Hawaii to re-publish to the retailer.
Review	Supplier needs to review data provided. The Confirmation message will include the error code and message from Webco Hawaii.

Steps to Begin Data Synchronization with Webco Hawaii

1. Load your item information into your home data pool and ensure it ready for publication. Contact your data pool or solution provider for any assistance you may require on this step.
2. Review the attribute requirement information in this document to ensure that you have the required attributes populated.
3. Send your Data Contact information to Webco Hawaii if you have not already done so.
4. Webco Hawaii will create a subscription for your Information Provider GLN / Target Market US.
5. Webco Hawaii will email the Supplier's GDSN Contact a list of items Webco Hawaii needs published to them. This list will be in Excel format.
6. Supplier should review the list of items and notify Webco Hawaii of any obsolete items. Return the Excel file highlighting those items that are obsolete. Webco Hawaii will notify Wal-Mart that these items are obsolete.
7. Supplier should first publish a small number of items to Webco Hawaii. Webco Hawaii will review these items and synchronize them with Wal-Mart.
8. Webco Hawaii will notify the Supplier's GDSN Contact that the small number of items were successfully synchronized with Wal-Mart.
9. Supplier will publish all remaining current items to Webco Hawaii. Webco Hawaii will review these items and synchronize them with Wal-Mart.
10. Supplier will update GDSN will all changes and corrections to items. Webco Hawaii will automatically propagate these changes to its GDSN information.
11. The current new item introduction process in place at Webco Hawaii will remain as is.

What Will Webco Hawaii Do With Supplier's Data

Given the local environment, Webco Hawaii will determine what levels of the product hierarchy that will be sold to Wal-Mart and other retailers.

- Webco Hawaii will change the Orderable Flag and other order-related fields as required to meet local conditions.
- Webco Hawaii will publish at the appropriate level to meet local conditions.

Webco Hawaii GDSN Attribute Requirements

Webco Hawaii currently requires the following minimal set of attributes. These may change in future as retailers change their requirements.

- GTIN
- Product Type (e.g. case, inner pack, each, etc.)
- Target Market
- Information Provider GLN
- Brand Name
- Functional Name
- Product Description
- Global Product Classification Code
- Start Availability Date
- Dimensions – Height, Width, Depth and Unit of Measure
- **Gross Weights at every level of the packaging hierarchy**
- Base Unit, Consumer Unit, Orderable Unit, Shipping (Despatch) Unit, Invoice Unit, Variable Weight Unit Indicators
- Net Content on Base Unit or Consumer Unit
- Package Marked Returnable
