1.2 GLN – Publish To

Production: 0860004496595

2 Steps to begin Synchronizing your data

Implementation Steps

1. Our Attribute Guide is available for download and review on our landing page at <https://1worldsync.com/community/find-a-trading-partner/mealsuite/>. If you are currently unable to provide the full list of attributes requested, please send what you have available today. You can send additional attributes as they become available.
2. Complete the **Trading Partner Form** on the landing page at <https://1worldsync.com/community/find-a-trading-partner/mealsuite/>. MealSuite will then contact you once they have created a subscription for your GLN and let you know they are ready for you to publish per the instructions below.
3. Have your accurate item data loaded into your GDSN certified data pool and ensure your items are ready for publication in Production.
 - a. Contact your data pool for any education you might require completing this step.

Publication Steps

1. MealSuite requests suppliers publish full catalog for all categories with a prioritization on food and beverage products to MealSuite's GLN 0860004496595 in Production.
2. Please publish all products as "Initial Load"
3. MealSuite will respond back to Publications with a CIC Message.
 - a. "RECEIVED" Catalog Item Confirmation messages (CICs) will automatically be returned upon receipt of content from Suppliers.
 - b. If a "REVIEW" message is returned, please update your item with the information requested. These updates will automatically flow to MealSuite. Continue this process until a CIC "SYNCHRONIZED" is received.
 - c. If a "SYNCHRONIZED" message is returned this means that MealSuite has received all of the required fields needed to publish the product and the product's nutrient data in the MealSuite system.
4. Send ongoing item maintenance notifications through your GDSN Certified Data Pool (e.g., IWorldSync) to the MealSuite GLN

3 Attribute Requirements

Our Attribute Guide is available for download and review on our landing page at <https://iworldsync.com/community/find-a-trading-partner/mealsuite/>.

MealSuite relies on accurate and up to date Food Label Requirements information in order to best serve our mutual customers. Please prioritize meeting the attribute requirements listed in MealSuite's attribute Guide in the following modules:

- NUTRITION INFORMATION MODULE
- ALLERGEN INFORMATION MODULE
- INGREDIENT INFORMATION

If you are currently unable to provide the full list of attributes requested, please still send what you have available today. You can send additional attributes as they become available.

Note: IWorldSync Item Management GUI Users can apply the Food & Beverage Products Playlist to assist with meeting the attribute requirements when publishing your item data to MealSuite.
