Re: Item Data Synchronization

To all our valued suppliers,

Interflex has implemented Data Synchronization to better meet the requirements of our foodservice customers and to streamline delivery of accurate item information between our systems. Our K–12 bid solutions equip school operators with tools to streamline the bid and procurement process, providing access to accurate and comprehensive product information. Our goal is to ensure they have the most current data from your organization to enhance bid specifications, evaluate nutritional content and equivalencies, and make more informed procurement decisions. To support these objectives, we ask that you begin synchronizing your item data with us through the Global Data Synchronization Network (GDSN) as soon as possible.

Please take the following required steps to publish and synchronize your items:

1. To begin data synchronization with Interflex, complete the GDSN supplier trading partner form at <https://1worldsync.com/trading-partners/interflex/>
2. If your company has implemented GDSN, please review the Interflex Implementation Guide (available at the same site above) on how to synchronize your item data with us.
3. If your company has not implemented GDSN, select a certified GDSN Data Pool or Solution Provider. Interflex is using 1WorldSync as our certified Data Pool for receiving item publications. If you would like information on how to join 1WorldSync, please reach out to businessdevelopment@1worldsync.com.
4. We request that you publish your entire catalog of items.

We thank you in advance and look forward to partnering with your organization to reach our mutual objective of streamlined information about your items to our foodservice customers.

For more information and current versions of our data synchronization documents, please visit <https://1worldsync.com/trading-partners/interflex/>.

Sincerely,

The Interflex Team
