

Next Generation Regulatory Classifications

Smarter Sorting's product Registration and Classification process uses Regulatory AI to create fast, accurate, 100% transparent classifications for waste and transportation. We never require formulators to share their product's full formula, and we help you get products to shelves in days instead of months.

GET PRODUCTS TO SHELVES FASTER

- Status Quo: 2-3 months to classify new products
- Smarter Sorting: 1-3 days
- That's 2-3 extra months on the shelves of major retailers

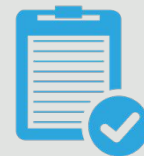

ACCURATE CLASSIFICATION

- Unlock potential shipping savings (up to \$2K/pallet)
- Classify correctly with Smarter Sorting's machine learning platform
- Leverage exceptions for Ground, Air, & Sea to further lower shipping costs

“I'm surprised nobody has said ‘why are we shipping it this way?’ because that's a big deal.”

- Major Battery Brand, reviewing Smarter Sorting improvements to classifications

CLASSIFICATION PORTAL

A cross-industry solution to the challenges and frustrations that plague both retailers and formulators. Smarter Sorting's Online Portal enables formulators to quickly and easily upload products for classification by its Machine Learning-powered Classification Engine. Includes automated acquisition of Safety Data Sheets, Packaging Details, and other critical chemical and regulatory data.

- Protects IP
- Transparent classification process
- User-centric UI/UX
- Redundancy-free data
- Sustainability dividend

The screenshot shows the 'Product classification' page in the Smarter Sorting portal. The interface includes a navigation sidebar on the left with options like 'Dashboard', 'Unsent products', and 'Classified products'. The main content area displays a classification result for 'Retail Chlorinated cleaner' with a 'Flag classification' button. Below this, there is a 'Shipping classification (overview)' section with a table of shipping options.
