

How to Populate Child Nutrition Information

- You must populate Child Nutrition Information in order to meet the data synchronization requirements of many K-12 schools.
- **If you are a supplier of a 1WorldSync recipient that requires CN Info:**
 - A representative from 1WorldSync will send you the list of items associated with your IP GLN that require Child Nutrition Information
 - Read on for more detailed information on how to populate these attributes using 1WorldSync tools
- **If you are not a 1WorldSync customer, or if you use a M2M connection to maintain your product information:**
 - You will need to use Item Modify messaging to populate these attributes. Contact your Solution Partner or Data Pool for more information.

CN Attributes: What Suppliers Need to Know

Attributes you are required to publish as a K-12 supplier:

- **CN Label:** Yes
- **CN Label Numbers:** XXXXXX
- **URL:** A signed copy of the CN statement in .pdf form must be submitted via this attribute field.
- **To be added to GSMP:**
 - **CN Statement:** One X.XX unit provides X.XX equivalent requirement for Child Nutrition Meal Pattern Requirements.

Populating CN Info: 1WorldSync Tools

- Use the **1WorldSync Item Management** tool if you have relatively few items to edit (1-10)
- Use the **Spreadsheet Load Tool** if you have many items to edit (more than 10)
- You can also use **fuse** to submit the Child Nutrition Statement if you have already entered CN Credit Info

Child Nutrition “Help Sheets”
